ABOUT ME

I am a **Laravel Fullstack Developer** who enjoys bridging the gap between complex backend logic and intuitive user experiences. My journey started as an intern at IT Way BD, where I quickly grew into a Junior Developer role by delivering high-quality code for ERP and CRM systems. I specialize in the PHP/Laravel ecosystem and **Vue.js**, and I'm a firm believer in using **AI-assisted development** to write cleaner, more efficient code. I don't just build features; I build solutions that help businesses scale.

TECHNICAL EXPERTISE

- **Frameworks & Languages:** PHP (Laravel), JavaScript (ES6+), **Vue.js**, React.js, Tailwind CSS, Blade.
- **Database & Architecture:** MySQL (Optimization & Normalization), MongoDB, RESTful API Design.
- **AI-Enhanced Development:** GitHub Copilot, Cursor AI, ChatGPT-4o (used for refactoring and debugging).
- **Development Tools:** Git/GitHub, Postman, VS Code, Microsoft Power BI, Cisco Packet Tracer.

PROFESSIONAL JOURNEY

Junior Laravel Software Developer *Sept 2025 – Present*
IT Way BD *Dhaka, Bangladesh*

- **Netacart E-commerce:** I lead the backend development for this shopping platform, where I engineered a multi-vendor inventory system and integrated secure checkout flows to ensure a smooth buyer journey.
- **Interactive UIs:** Leveraged **Vue.js** to build dynamic frontend components, improving the platform's responsiveness and overall user engagement.
- **API Reliability:** Designed robust REST APIs that serve as the backbone for mobile app synchronization.
- **Performance Culture:** Reduced server response times by 25% by refactoring legacy Eloquent queries and implementing smart database indexing.

Software Developer Intern *April 2025 – Sept 2025*
IT Way BD *Dhaka, Bangladesh*

- **Xtream ERP:** Deep-dived into enterprise logic by developing core modules for Inventory and Payroll management, focusing on data accuracy and user roles.
- **CRM Innovation:** Contributed to a custom CRM tool that automated lead tracking, helping the sales team manage client histories more effectively.
- **Collaborative Learning:** Worked closely with senior engineers to adopt PSR-12 coding standards, ensuring our codebase remained maintainable as the team grew.

NOTABLE PROJECTS

1st Prize - DBMS Architecture Competition *April 2023*
Techfest Spring, Independent University, Bangladesh

- Outperformed 20+ teams by designing a highly normalized database for a complex logistics system, prioritizing query speed and data integrity.

Canteen Automation System *Academic Project*

- Developed a full-stack solution to digitize manual canteen records, featuring real-time stock alerts and automated billing that eliminated 90% of manual entry errors.

EDUCATION

Independent University, Bangladesh (IUB) *2019 – 2024*
Bachelor of Science in Computer Science and Engineering *Dhaka, Bangladesh*

Notre Dame College Mymensingh *2016 – 2018*
Higher Secondary Certificate (HSC), Science *Mymensingh, Bangladesh*
